

OVERVIEW

St. Philip Catholic Church of Franklin, Tennessee was seeking an energy solution partner for a retrofit of the altar and surrounding areas within the parish worship space. The existing lighting was high-wattage, high-maintenance and an inefficient expenditure of church funds. They sought to reduce energy and maintenance costs, while simultaneously improving the beautiful appeal of the worship area.

CHALLENGE

- Cut maintenance expense by 100%
- Enhance the appearance of the altar and cross

SOLUTION

- Complete LED retrofit and replacement of the altar and surrounding space
- Install cutting edge fixtures across the worship space
- Add accent lighting behind the cross
- Install controls to manage the lighting levels and aesthetic appearance

RESULT

- Maintenance expense reduced by 100%
- Dramatically enriched lighting on the altar, crucifix and surrounding worship space

The Helios Energy Impact

Dramatic improvement in aesthetic appearance of the altar

Improved morale of parishioners and parish leaders
